High-Tech made in Switzerland

Success through concentration on key competencies -
MPL AG celebrates its 20th anniversary

"Eager to really differentiate to the mass products and offer more than solutions."

MPL AG located in Dättwil Switzerland near Zürich develops and manufactures Industrial and Embedded Controller, Industrial PC's and Systems specialized for industrial needs and extremely rugged environments. The company is 100% self financed and fully independent.

All products are developed and produced by MPL AG in Switzerland. They are being used in any part of the world and in numerous critical applications. The success story of the enterprise is based on the uniqueness of their product range like the PC compatible industrial computer concept (PIP)

MPLs unique and innovative solutions give the customers a quality product that is specifically designed

and layouted for their specific markets with highest requirements and help them to differentiate their products. However the products are not just rugged – they are additionally long-term available. Customer support is a significant strength of MPL and one of the keys for an excellent partnership with it's customers over 20 years. Some MPL products and customized solutions are produced since 1985 are still fully supported.

Key strengths in developing and manufacturing technology of MPL AG are:

- the low power consumption of the designed products
- the extended temperature range that are being offered for all products
- the customized and semi-customized solutions based on customer needs also for small quantities
- the uniquely fast and professional support that comes with every product

After 20 years of developing and supplying products and solutions for industrial environments, medical, transportation as well as for avionics applications, MPL is still eager to really differentiate through concentration on their key competencies to invent High-Tech solutions for application where a reliable solution is needed. MPL AG has delivered in the past, products in very sophisticated operational fields like the MIR Station, the Space shuttle, in Hospital operation rooms, in Cryptology application or an Emergency ground control flight system. In other words, whenever a reliable, durable and high quality product was needed, MPL was selected as partner.

In the past 20 years MPL has been nominated for its achievements in various contest, latest one at B.E.S.T (Business Excellent Swiss Trophy) in the category "Young Enterprise" in June 2005. Further MPL was frequently positively mentioned in the media, major ones in Dec. 2004 in the Swiss evening news, or in GEO (German version of National Geographies) April 2005 issue.
